Ms. Leslie Bamann
Supervisor
Town of Victor
1290 Blossom Drive
Victor, New York 14564

RE: Site No. 8-35-013
Modock Road Springs/DLS Sand and Gravel, Inc., Site Update

Dear Supervisor Bamann:

The following is a chronologic summary of activities related to the Remedial Investigation and Feasibility Study (RI/FS) currently being completed at the Modock Road Springs/DLS Sand and Gravel, Inc., site. No update was provided to the Town on March 7, 2008. This update includes activities occurring since the last update provided on February 22, 2008.

SUMMARY OF ACTIVITIES

February 22, 2008 - March 21, 2008

February 27, 2008 - Completed physical testing of one mitigation system. In total, between January 30, 2008 and February 27, 2008, physical testing was completed at seven (7) homes that had volunteered for the additional testing. The New York State Department of Environmental Conservation (Department) staff are finalizing letters summarizing the results of physical testing of these mitigation systems.

Ongoing - Department staff continue to review the revised version of the Focused Feasibility Study for Groundwater Interim Remedial Measure Report. Department staff are currently reviewing the revised report and expect to either issue additional comments or determine that the document is final and place it in the document repositories. It is expected that review of the revised report will be completed by April 2008. Based on the IRM evaluation, the Department Project Manager continues to prepare a Decision Document. The Decision Document will outline the proposed IRM action and it is expected to be available for public review early in 2008.

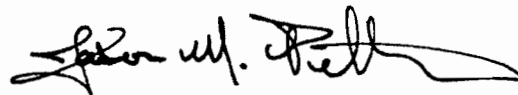

Ongoing - A third party data validator completed review of the final laboratory analytical results from the vapor intrusion sampling completed between December 11, 2007 and January 7, 2008. The Department received the validated final laboratory analytical results in early March 2008 and is currently evaluating the data and working with the New York State Department of Health (NYSDOH) in preparation of the homeowner letters. The third party data validator is currently reviewing the final laboratory analytical results from the vapor intrusion sampling completed at one location on January 18, 2008. The Department is expecting to receive validated final laboratory analytical results for this location by mid-April 2008.

Ongoing - Department staff continue to respond to periodic telephone calls and requests for information.

Ongoing - Department staff continue to prepare updates to the Town of Victor prior to Town Board meetings on the second and fourth Monday of each month.

Please do not hesitate to call Mr. Joseph White or myself at 1-888-459-8667 with any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Jason M. Pelton", with a long horizontal flourish extending to the right.

Jason M. Pelton
Project Manager
