Instructions for Completing Part 1

Part 1 is to be completed by the applicant or project sponsor. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification.

Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information.

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either “Yes” or “No”. If the answer to the initial question is “Yes”, complete the sub-questions that follow. If the answer to the initial question is “No”, proceed to the next question. Section F allows the project sponsor to identify and attach any additional information. Section G requires the name and signature of the project sponsor to verify that the information contained in Part 1 is accurate and complete.

A. Project and Sponsor Information.

<tr>
<td>Brief Description of Proposed Action (include purpose or need):</td>
<td>The Town of Victor plans to adopt the Route 96 Transformative Corridor Strategic Infrastructure Plan (the &quot;Plan&quot;) developed in order to improve traffic conditions within the Route 96 Corridor in the Town and Village of Victor, including at key intersections. The Town plans to fund and implement the six high priority projects identified in the Plan in coordination with the Village of Victor, Ontario County, Genesee Transportation Council, New York State Department of Transportation, and Finger Lakes Railway. The six high priority projects are: 1) New local street along Ontario Central Railroad; 2) Route 96 3-Lane to 5-Lane Conversion; 3) Route 251/Lane Road Connection; 4) Omnitech Place/Willowbrook Road Connection; 5) Plastermill Road/Collett Road/Delray Drive Connection; and 6) Lane Road/Victor Egypt Road/Lynaugh Road Roundabout. Detailed project description, anticipated outcomes, and construction cost estimates for each high priority project are provided in the attachment. The Town also seeks to establish a Transportation Development District in order to raise the capital needed to construct the six high priority projects by levying assessments on a benefits-derived basis.</td>

### C. Planning and Zoning

#### C.1. Planning and zoning actions.

Will administrative or legislative adoption, or amendment of a plan, local law, ordinance, rule or regulation be the only approval(s) which must be granted to enable the proposed action to proceed? □ Yes □ No

- **If Yes**, complete sections C, F and G.
- **If No**, proceed to question C.2 and complete all remaining sections and questions in Part 1

#### C.2. Adopted land use plans.

a. Do any municipally-adopted (city, town, village or county) comprehensive land use plan(s) include the site where the proposed action would be located? □ Yes □ No

If Yes, does the comprehensive plan include specific recommendations for the site where the proposed action would be located? The Plan recommends the implementation of prioritized projects to solve traffic congestion & safety issues, especially along the Route 96 corridor.

b. Is the site of the proposed action within any local or regional special planning district (for example: Greenway Brownfield Opportunity Area (BOA); designated State or Federal heritage area; watershed management plan; or other?) □ Yes □ No

If Yes, identify the plan(s):

   ____________________________________________________________
   ____________________________________________________________
   ____________________________________________________________

C. Town of Victor Agricultural & Farmland Protection Plan 2015

C. Ontario County Agricultural Enhancement Plan
C.3. Zoning

**a. Is the site of the proposed action located in a municipality with an adopted zoning law or ordinance?**
- [x] Yes
- [ ] No

**If Yes, what is the zoning classification(s) including any applicable overlay district?**
- Town of Victor: Commercial, Commercial - Light Industrial, Light Industrial, Residential - 2, Multiple Dwelling, and Planned Development District
- Village of Victor: Industrial, Business, and One-Family Residential

**b. Is the use permitted or allowed by a special or conditional use permit?**
- [ ] Yes
- [x] No

**c. Is a zoning change requested as part of the proposed action?**
- [ ] Yes
- [x] No

**i. What is the proposed new zoning for the site?**

C.4. Existing community services.

**a. In what school district is the project site located?**
- Victor Central School District

**b. What police or other public protection forces serve the project site?**
- Ontario County Sheriff's Office and NYS Troopers

**c. Which fire protection and emergency medical services serve the project site?**
- Victor Fire Department, Fishers Fire District, and Victor-Farmington Volunteer Ambulance Corps

**d. What parks serve the project site?**
- Lehigh Crossing Park, Victor Municipal Park, and Mead Square Park

D. Project Details

**D.1. Proposed and Potential Development**

**a. What is the general nature of the proposed action (e.g., residential, industrial, commercial, recreational; if mixed, include all components)?** Municipal road network improvements

**b. a. Total acreage of the site of the proposed action?** +/- 30.0 acres

**b. Total acreage to be physically disturbed?** +/- 28.8 acres

**c. Total acreage (project site and any contiguous properties) owned or controlled by the applicant or project sponsor?**
- Town Roads & ROWs: +/- 3.5 acres

**c. Is the proposed action an expansion of an existing project or use?**
- [x] Yes
- [ ] No

**i. If Yes, what is the approximate percentage of the proposed expansion and identify the units (e.g., acres, miles, housing units, square feet)?** % ________________ Units: ________________

**d. Is the proposed action a subdivision, or does it include a subdivision?**
- [x] Yes
- [ ] No

**i. Purpose or type of subdivision? (e.g., residential, industrial, commercial; if mixed, specify types)**

**ii. Is a cluster/conservation layout proposed?**
- [ ] Yes
- [x] No

**iii. Number of lots proposed?** ______

**iv. Minimum and maximum proposed lot sizes?**
- Minimum __________
- Maximum __________

**e. Will proposed action be constructed in multiple phases?**
- [x] Yes
- [ ] No

**i. If No, anticipated period of construction:** ______ months

**ii. If Yes:**
- Total number of phases anticipated: ______ 6
- Anticipated commencement date of phase 1 (including demolition): ______ month TBD year
- Anticipated completion date of final phase: ______ month TBD year
- Generally describe connections or relationships among phases, including any contingencies where progress of one phase may determine timing or duration of future phases:

> All high priority projects depend on the success of each other’s implementation for a systematic mitigation of traffic congestion along the Route 96 corridor. Specifically, the Project #6 will build on the improvements resulting from Projects #1 and #3.
f. Does the project include new residential uses?
   If Yes, show numbers of units proposed.

   Yes ☐ No ☑

g. Does the proposed action include new non-residential construction (including expansions)?
   If Yes,
   i. Total number of structures
   ii. Dimensions (in feet) of largest proposed structure: height; width; and length
   iii. Approximate extent of building space to be heated or cooled: square feet
   
   Yes ☐ No ☑

h. Does the proposed action include construction or other activities that will result in the impoundment of any liquids, such as creation of a water supply, reservoir, pond, lake, waste lagoon or other storage?
   If Yes,
   i. Purpose of the impoundment:
   ii. If a water impoundment, the principal source of the water: Ground water ☐ Surface water streams ☐ Other specify:
   iii. If other than water, identify the type of impounded/contained liquids and their source:
   iv. Approximate size of the proposed impoundment. Volume: million gallons; surface area: acres
   v. Dimensions of the proposed dam or impounding structure: height; length
   vi. Construction method/materials for the proposed dam or impounding structure (e.g., earth fill, rock, wood, concrete):
   
   Yes ☐ No ☑

D.2. Project Operations

a. Does the proposed action include any excavation, mining, or dredging, during construction, operations, or both? (Not including general site preparation, grading or installation of utilities or foundations where all excavated materials will remain onsite)
   Yes ☐ No ☑

   The majority of the excavated materials is anticipated to remain on-site.

   If Yes:
   i. What is the purpose of the excavation or dredging?
   ii. How much material (including rock, earth, sediments, etc.) is proposed to be removed from the site?
      • Volume (specify tons or cubic yards):
      • Over what duration of time?
   iii. Describe nature and characteristics of materials to be excavated or dredged, and plans to use, manage or dispose of them.
   iv. Will there be onsite dewatering or processing of excavated materials?
      Yes ☐ No ☑

   v. What is the total area to be dredged or excavated? acres
   vi. What is the maximum area to be worked at any one time? acres
   vii. What would be the maximum depth of excavation or dredging? feet
   viii. Will the excavation require blasting?
      Yes ☐ No ☑

   ix. Summarize site reclamation goals and plan:

   b. Would the proposed action cause or result in alteration of, increase or decrease in size of, or encroachment into any existing wetland, waterbody, shoreline, beach or adjacent area?
      Yes ☐ No ☑

   i. Identify the wetland or waterbody which would be affected (by name, water index number, wetland map number or geographic description):
   Potentially Great Brook (NYSDEC ID: 898-156) - Railway parallel to Adams Street; a tributary to Irondequoit Creek (846-109) - NYS Route 96/Victor-Pittsford Road & Willowbrook Road; and a tributary to Mud Creek (898-155) - County Road 9/Victor Egypt Road & Lane Road. Potentially to NYSDEC Wetlands FA-2 and VT-2 & associated 100-ft buffer zones in addition to federal wetlands.
Excavations associated with either directional drilling or trench construction will be filled, regraded, and seeded as soon as possible following construction.

Will the proposed action use any existing public wastewater treatment facilities?

<table>

- Total anticipated liquid waste generation per day: ____________________ gallons/day

vii. If water supply will be from wells (public or private), maximum pumping capacity: _______ gallons/minute.

viii. If water supply will be from wells (public or private), maximum pumping capacity: _______ gallons/minute.

ix. If water supply will be from wells (public or private), maximum pumping capacity: _______ gallons/minute.

x. If water supply will be from wells (public or private), maximum pumping capacity: _______ gallons/minute.

xi. If water supply will be from wells (public or private), maximum pumping capacity: _______ gallons/minute.
- Do existing sewer lines serve the project site?  ☐ Yes ☐ No
- Will line extension within an existing district be necessary to serve the project?  ☐ Yes ☐ No
  If Yes:
  • Describe extensions or capacity expansions proposed to serve this project: ____________________________

iv. Will a new wastewater (sewage) treatment district be formed to serve the project site? ☐ Yes ☐ No
   If Yes:
   • Applicant/sponsor for new district: __________________________
   • Date application submitted or anticipated: __________________________
   • What is the receiving water for the wastewater discharge? __________________________

v. If public facilities will not be used, describe plans to provide wastewater treatment for the project, including specifying proposed receiving water (name and classification if surface discharge, or describe subsurface disposal plans):
   __________________________

vi. Describe any plans or designs to capture, recycle or reuse liquid waste: __________________________
   __________________________
   __________________________
   __________________________

E. Will the proposed action disturb more than one acre and create stormwater runoff, either from new point sources (i.e. ditches, pipes, swales, curbs, gutters or other concentrated flows of stormwater) or non-point source (i.e. sheet flow) during construction or post construction? ☐ Yes ☐ No
   If Yes:
   i. How much impervious surface will the project create in relation to total size of project parcel?  
      _____ Square feet or  +/- 18 acres (impervious surface)  
      _____ Square feet or  +/- 30 acres (parcel size) (project area)
   ii. Describe types of new point sources. TBD

iii. Where will the stormwater runoff be directed (i.e. on-site stormwater management facility/structures, adjacent properties, groundwater, on-site surface water or off-site surface waters)?  
     on-site stormwater management structures, adjacent properties, and/or off-site surface waters
     __________________________
     __________________________

iv. Does proposed plan minimize impervious surfaces, use pervious materials or collect and re-use stormwater? ☐ Yes ☐ No

f. Does the proposed action include, or will it use on-site, one or more sources of air emissions, including fuel combustion, waste incineration, or other processes or operations? ☐ Yes ☐ No
   If Yes, identify:
   i. Mobile sources during project operations (e.g., heavy equipment, fleet or delivery vehicles)  
      Fuel-dependent vehicles passing through the Town and Village of Victor will utilize the improved transportation network, but no dedicated on-site fuel combustion will take place.
   ii. Stationary sources during construction (e.g., power generation, structural heating, batch plant, crushers)  
      Stationary sources during construction (e.g., power generation, structural heating, batch plant, crushers)

iii. Stationary sources during operations (e.g., process emissions, large boilers, electric generation)  
     __________________________
     __________________________

G. Will any air emission sources named in D.2.f (above), require a NY State Air Registration, Air Facility Permit, or Federal Clean Air Act Title IV or Title V Permit? ☐ Yes ☐ No
   If Yes:
   i. Is the project site located in an Air quality non-attainment area? (Area routinely or periodically fails to meet ambient air quality standards for all or some parts of the year)  ☐ Yes ☐ No
   ii. In addition to emissions as calculated in the application, the project will generate:
       • _____ Tons/year (short tons) of Carbon Dioxide (CO₂)
       • _____ Tons/year (short tons) of Nitrous Oxide (N₂O)
       • _____ Tons/year (short tons) of Perfluorocarbons (PFCs)
       • _____ Tons/year (short tons) of Sulfur Hexafluoride (SF₆)
       • _____ Tons/year (short tons) of Carbon Dioxide equivalent of Hydrofluorocarbons (HFCs)
       • _____ Tons/year (short tons) of Hazardous Air Pollutants (HAPs)
h. Will the proposed action generate or emit methane (including, but not limited to, sewage treatment plants, landfills, composting facilities)?
   If Yes:
   i. Estimate methane generation in tons/year (metric):
   ii. Describe any methane capture, control or elimination measures included in project design (e.g., combustion to generate heat or electricity, flaring):

i. Will the proposed action result in the release of air pollutants from open-air operations or processes, such as quarry or landfill operations?
   If Yes: Describe operations and nature of emissions (e.g., diesel exhaust, rock particulates/dust):

<table>
<thead>
<tr>
<th>Item</th>
<th>Yes</th>

</tbody>
</table>

j. Will the proposed action result in a substantial increase in traffic above present levels or generate substantial new demand for transportation facilities or services? The proposed action will neither increase nor decrease traffic. However, the action will provide additional infrastructure to accommodate the traffic volume, which is anticipated to increase with or without the action.
   If Yes:
   i. When is the peak traffic expected (Check all that apply): Morning ✔ Evening ✔ Weekend ✔
   ii. For commercial activities only, projected number of semi-trailer truck trips/day: NA, not commercial
   iii. Parking spaces: Existing NA Proposed NA Net increase/decrease NA
   iv. Does the proposed action include any shared use parking? Yes ✔ No ✔
v. If the proposed action includes any modification of existing roads, creation of new roads or change in existing access, describe:
   1) New local street along Ontario Central Railroad; 2) Route 96 3-Lane to 5-Lane Conversion; 3) Route 251/Lane Road Connection; 4) Omnitech Place/Willowbrook Road Connection; 5) Plastermill Road/Collett Road/DeRuyter Drive Connection; and 6) Lane Road/Victor Egypt Road/Lynaugh Road Roundabout. Detailed project description of each high priority project is provided in the attachment.
   vi. Are public/private transportation service(s) or facilities available within ½ mile of the proposed site? Yes ✔ No ✔
vii. Will the proposed action include access to public transportation or accommodations for use of hybrid, electric or other alternative fueled vehicles? Yes ✔ No ✔
viii. Will the proposed action include plans for pedestrian or bicycle accommodations for connections to existing pedestrian or bicycle routes? Yes ✔ No ✔

k. Will the proposed action (for commercial or industrial projects only) generate new or additional demand for energy? Not commercial or industrial
   If Yes:
   i. Estimate annual electricity demand during operation of the proposed action:
   ii. Anticipated sources/suppliers of electricity for the project (e.g., on-site combustion, on-site renewable, via grid/local utility, or other):
   iii. Will the proposed action require a new, or an upgrade to, an existing substation? Yes ✔ No ✔

l. Hours of operation. Answer all items which apply.
   i. During Construction:
      • Monday - Friday: generally 7 am - 5 pm
      • Saturday: generally 7 am - 5 pm
      • Sunday: generally 7 am - 5 pm
      • Holidays: generally 7 am - 5 pm
   ii. During Operations:
      • Monday - Friday: 24 hours a day
      • Saturday: 24 hours a day
      • Sunday: 24 hours a day
      • Holidays: 24 hours a day
m. Will the proposed action produce noise that will exceed existing ambient noise levels during construction, operation, or both?  
   - [ ] Yes  [ ] No
   If Yes:
   i. Provide details including sources, time of day and duration:
      Construction vehicles and operations will temporarily increase the ambient noise levels. Once construction is complete, there will be no net increase in the noise levels. The only exceptions may be the Project #1 and #2 areas with increased capacity for vehicular, bike, and/or foot traffic.

ii. Will the proposed action remove existing natural barriers that could act as a noise barrier or screen?  
   - [ ] Yes  [ ] No
   Describe: ________________________________________________________________

n. Will the proposed action have outdoor lighting?  
   - [ ] Yes  [ ] No
   If Yes:
   i. Describe source(s), location(s), height of fixture(s), direction/aim, and proximity to nearest occupied structures:
      Street pole lighting installed at regular intervals along new road segments resulting from the proposed improvements.

ii. Will the proposed action remove existing natural barriers that could act as a light barrier or screen?  
   - [ ] Yes  [ ] No
   Describe: ________________________________________________________________

o. Does the proposed action have the potential to produce odors for more than one hour per day?  
   - [ ] Yes  [ ] No
   If Yes, describe possible sources, potential frequency and duration of odor emissions, and proximity to nearest occupied structures: ________________________________________________________________

p. Will the proposed action include any bulk storage of petroleum (combined capacity of over 1,100 gallons) or chemical products 185 gallons in above ground storage or any amount in underground storage?  
   - [ ] Yes  [ ] No
   If Yes:
   i. Product(s) to be stored
   ii. Volume(s) __________________ per unit time _____________ (e.g., month, year)
   iii. Generally describe proposed storage facilities: ________________________________________________________________

q. Will the proposed action (commercial, industrial and recreational projects only) use pesticides (i.e., herbicides, insecticides) during construction or operation?  
   - [ ] Yes  [ ] No
   - [ ] Not commercial, industrial, or recreational
   If Yes:
   i. Describe proposed treatment(s):
      ________________________________________________________________

ii. Will the proposed action use Integrated Pest Management Practices?  
   - [ ] Yes  [ ] No

r. Will the proposed action (commercial or industrial projects only) involve or require the management or disposal of solid waste (excluding hazardous materials)?  
   - [ ] Yes  [ ] No
   - [ ] Not commercial or industrial
   If Yes:
   i. Describe any solid waste(s) to be generated during construction or operation of the facility:
      • Construction: ____________________ tons per ____________________ (unit of time)
      • Operation: ____________________ tons per ____________________ (unit of time)
   ii. Describe any proposals for on-site minimization, recycling or reuse of materials to avoid disposal as solid waste:
      • Construction: ________________________________________________________________
      • Operation: ________________________________________________________________
   iii. Proposed disposal methods/facilities for solid waste generated on-site:
      • Construction: ________________________________________________________________
      • Operation: ________________________________________________________________
s. Does the proposed action include construction or modification of a solid waste management facility? □ Yes ☑ No
   If Yes:
   i. Type of management or handling of waste proposed for the site (e.g., recycling or transfer station, composting, landfill, or other disposal activities): ____________________________________________
   ii. Anticipated rate of disposal/processing:
       • _______ Tons/month, if transfer or other non-combustion/thermal treatment, or
       • _______ Tons/hour, if combustion or thermal treatment
   iii. If landfill, anticipated site life: ____________________________ years

   t. Will proposed action at the site involve the commercial generation, treatment, storage, or disposal of hazardous waste? □ Yes ☑ No
      If Yes:
      i. Name(s) of all hazardous wastes or constituents to be generated, handled or managed at facility: _______________________________________________
      ii. Generally describe processes or activities involving hazardous wastes or constituents: _______________________________________________________
          _______________________________________________________
      iii. Specify amount to be handled or generated _______ tons/month
      iv. Describe any proposals for on-site minimization, recycling or reuse of hazardous constituents: ________________________________
          _______________________________________________________
          _______________________________________________________
      v. Will any hazardous wastes be disposed at an existing offsite hazardous waste facility? □ Yes ☑ No
         If Yes: provide name and location of facility: ________________________________
         _______________________________________________________
         _______________________________________________________
         If No: describe proposed management of any hazardous wastes which will not be sent to a hazardous waste facility:
         _______________________________________________________
         _______________________________________________________

**E. Site and Setting of Proposed Action**

**E.1. Land uses on and surrounding the project site**

   a. Existing land uses.
      i. Check all uses that occur on, adjoining and near the project site.
         □ Urban ☑ Industrial ☑ Commercial ☑ Residential (suburban) ☐ Rural (non-farm)
         □ Forest ☐ Agriculture ☐ Aquatic ☑ Other (specify): Roads, right-of-ways, intersections, and railway
      ii. If mix of uses, generally describe:
           _______________________________________________________
           _______________________________________________________

   b. Land uses and covertypes on the project site.

c. Is the project site presently used by members of the community for public recreation?  
   i. If Yes: explain: ________________________________

   Yes ☐ No ☑

---

d. Are there any facilities serving children, the elderly, people with disabilities (e.g., schools, hospitals, licensed day care centers, or group homes) within 1500 feet of the project site?  
   If Yes,  
   i. Identify Facilities:  
      Victor Central School District campus, Victor Farmington Preschool, Jack n Jilll Child Care Centers, Victor Child Care Center, Legacy Child Care Ventures, Inc., Doodle Bugs! Children's Center, and Victor Ira group home

   Yes ☐ No ☑

---

e. Does the project site contain an existing dam?  
   If Yes:  
   i. Dimensions of the dam and impoundment:  
      • Dam height: _______________________________ feet  
      • Dam length: _______________________________ feet  
      • Surface area: _______________________________ acres  
      • Volume impounded: _______________________________ gallons OR acre-feet

   ii. Dam's existing hazard classification:  

   iii. Provide date and summarize results of last inspection:

   Yes ☐ No ☑

---

f. Has the project site ever been used as a municipal, commercial or industrial solid waste management facility, or does the project site adjoin property which is now, or was at one time, used as a solid waste management facility?  
   If Yes:  
   i. Has the facility been formally closed?  
   • If yes, cite sources/documentation: ________________________________

   ii. Describe the location of the project site relative to the boundaries of the solid waste management facility:

   iii. Describe any development constraints due to the prior solid waste activities:

   Yes ☐ No ☑

---

g. Have hazardous wastes been generated, treated and/or disposed of at the site, or does the project site adjoin property which is now or was at one time used to commercially treat, store and/or dispose of hazardous waste?  
   If Yes:  
   i. Describe waste(s) handled and waste management activities, including approximate time when activities occurred:

   Yes ☐ No ☑

---

h. Potential contamination history. Has there been a reported spill at the proposed project site, or have any remedial actions been conducted at or adjacent to the proposed site?  
   If Yes:  
   i. Is any portion of the site listed on the NYSDEC Spills Incidents database or Environmental Site Remediation database?  
      Yes ☑ No ☐
      Yes – Spills Incidents database 2008-2018 Provide DEC ID number(s): 1110470, 1111390, and 1609645
      Yes – Environmental Site Remediation database Provide DEC ID number(s):
      □ Neither database

   ii. If site has been subject of RCRA corrective activities, describe control measures:  

   NA  

   □ Is the project within 2000 feet of any site in the NYSDEC Environmental Site Remediation database?  
   Yes ☑ No ☐
   If yes, provide DEC ID number(s): E835022 and V00495

   iv. If yes to (i), (ii) or (iii) above, describe current status of site(s):  

   The NYSDEC spill cases were all closed and deemed no further cleanup and removal actions are necessary. At the E835022 (Town Hall) site, NYSDEC removed underground storage tanks and contaminated soil before the new Town Hall was constructed. The V00495 site (Village Mart) withdrew its application to the NYSDEC Volunteer Cleanup Program.
v. Is the project site subject to an institutional control limiting property uses?  □ Yes □ No
   • If yes, DEC site ID number: ________________________________
   • Describe the type of institutional control (e.g., deed restriction or easement): ________________________________
   • Describe any use limitations: ________________________________
   • Describe any engineering controls: ________________________________
   • Will the project affect the institutional or engineering controls in place?  □ Yes □ No
   • Explain: ________________________________

E.2. Natural Resources On or Near Project Site

a. What is the average depth to bedrock on the project site?   +/- 6.5 feet

b. Are there bedrock outcroppings on the project site?  □ Yes □ No
   If Yes, what proportion of the site is comprised of bedrock outcroppings?  __________

c. Predominant soil type(s) present on project site:
   - Palmyra fine sandy loam  +/- 20 %
   - Phelps gravelly silt loam  +/- 20 %
   - Palmyra gravelly loam  +/- 15 %

d. What is the average depth to the water table on the project site?  Average:   +/- 5.3 feet
   Varies between 0 ft and > 6.5 ft

e. Drainage status of project site soils:  □ Well Drained: +/- 75 % of site
   □ Moderately Well Drained: +/- 10 % of site
   □ Poorly Drained: +/- 15 % of site

f. Approximate proportion of proposed action site with slopes:
   □ 0-10%: +/84 % of site
   □ 10-15%: +/- 1 % of site
   □ 15% or greater: +/- 15 % of site

g. Are there any unique geologic features on the project site?  □ Yes □ No
   If Yes, describe: ________________________________

h. Surface water features.
   i. Does any portion of the project site contain wetlands or other waterbodies (including streams, rivers, ponds or lakes)?  □ Yes □ No
   If Yes to either i or ii, continue. If No, skip to E.2.i.
   ii. Do any wetlands or other waterbodies adjoin the project site?  □ Yes □ No
   iii. Are any of the wetlands or waterbodies within or adjoining the project site regulated by any federal, state or local agency?  □ Yes □ No
   iv. For each identified regulated wetland and waterbody on the project site, provide the following information:
      - Streams:
         - Name 898-156, 846-109, and 898-155
         - Classification C
      - Lakes or Ponds:
         - Name
         - Classification
      - Wetlands:
         - Name Federal Waters
         - Approximate Size
   v. Are any of the above water bodies listed in the most recent compilation of NYS water quality-impaired waterbodies?  □ Yes □ No
      If yes, name of impaired water body/bodies and basis for listing as impaired:
      Name: Great Brook and minor tributaries
      Pollutants: Nutrients, D.O./Oxygen Demand, and Silt/Sediment
      Uses: Recreation and Aquatic Life

i. Is the project site in a designated Floodway?  □ Yes □ No

j. Is the project site in the 100 year Floodplain? The Eastern Terminus of the New Local Street (Project #1) near Plastermill Road is in close proximity to Route 96 ROW and southwest of Projects #1 & #2 areas.
   □ Yes □ No

k. Is the project site in the 500 year Floodplain?  □ Yes □ No

l. Is the project site located over, or immediately adjoining, a primary, principal or sole source aquifer?  □ Yes □ No
   If Yes:
      i. Name of aquifer: Principal Aquifer and Primary Aquifer
m. Identify the predominant wildlife species that occupy or use the project site:

Typical urban/suburban species such as squirrels, rabbits, raccoons, chipmunks, woodchucks, rodents, deer, foxes, and coyotes.

songbirds, crows, raptors, frogs, snakes,

n. Does the project site contain a designated significant natural community?  
   □ Yes  ✔ No

   i. Describe the habitat/community (composition, function, and basis for designation):

   ii. Source(s) of description or evaluation:

   iii. Extent of community/habitat:
   - Currently: _______________ acres
   - Following completion of project as proposed: _______________ acres
   - Gain or loss (indicate + or -): _______________ acres

o. Does project site contain any species of plant or animal that is listed by the federal government or NYS as endangered or threatened, or does it contain any areas identified as habitat for an endangered or threatened species?  
   □ Yes  ✔ No

p. Does the project site contain any species of plant or animal that is listed by NYS as rare, or as a species of special concern?  
   □ Yes  ✔ No

q. Is the project site or adjoining area currently used for hunting, trapping, fishing or shell fishing?  
   □ Yes  ✔ No

   If yes, give a brief description of how the proposed action may affect that use: ____________________________________________
   ____________________________________________________________________________________________________________

E.3. Designated Public Resources On or Near Project Site

a. Is the project site, or any portion of it, located in a designated agricultural district certified pursuant to Agriculture and Markets Law, Article 25-AA, Section 303 and 304?  
   □ Yes  ✔ No

   If Yes, provide county plus district name/number: _________________________________________________________________

b. Are agricultural lands consisting of highly productive soils present?  
   □ Yes  ✔ No

   i. If Yes: acreage(s) on project site? ________________________________

   ii. Source(s) of soil rating(s): ______________________________________

   c. Does the project site contain all or part of, or is it substantially contiguous to, a registered National Natural Landmark?  
   □ Yes  ✔ No

   If Yes:
   i. Nature of the natural landmark: □ Biological Community  □ Geological Feature

   ii. Provide brief description of landmark, including values behind designation and approximate size/extent:

   ____________________________________________________

   ____________________________________________________

   d. Is the project site located in or does it adjoin a state listed Critical Environmental Area?  
   □ Yes  ✔ No

   If Yes:
   i. CEA name: _________________________________________________

   ii. Basis for designation: ________________________________________

   iii. Designating agency and date: ________________________________
e. Does the project site contain, or is it substantially contiguous to, a building, archaeological site, or district which is listed on, or has been nominated by the NYS Board of Historic Preservation for inclusion on, the State or National Register of Historic Places?  
   □ Yes  □ No  
   Currently under SHPO review

If Yes:
   i. Nature of historic/archaeological resource: □ Archaeological Site  □ Historic Building or District
   ii. Name:
   iii. Brief description of attributes on which listing is based:

f. Is the project site, or any portion of it, located in or adjacent to an area designated as sensitive for archaeological sites on the NY State Historic Preservation Office (SHPO) archaeological site inventory?  
   □ Yes  □ No  
   Only Projects #1-5 areas, not #6

g. Have additional archaeological or historic site(s) or resources been identified on the project site?  
   □ Yes  □ No

If Yes:
   i. Describe possible resource(s):
   ii. Basis for identification:

h. Is the project site within five miles of any officially designated and publicly accessible federal, state, or local scenic or aesthetic resource?  
   □ Yes  □ No

If Yes:
   i. Identify resource:  
      - Erie Canal
      - Erie Canal Heritage Trail
      - Fishers Park
      - Lehigh Crossing Park
      - Mary Frances Bluebird Haven
      - Victor Municipal Park
   ii. Nature of, or basis for, designation (e.g., established highway overlook, state or local park, state historic trail or scenic byway, etc.):  
      - State historic trail and state/local parks
   iii. Distance between project and resource:  
      - 0.1 - 4.0 miles

i. Is the project site located within a designated river corridor under the Wild, Scenic and Recreational Rivers Program 6 NYCRR 666?  
   □ Yes  □ No

If Yes:
   i. Identify the name of the river and its designation:
   ii. Is the activity consistent with development restrictions contained in 6NYCRR Part 666?  
      □ Yes  □ No

F. Additional Information
Attach any additional information which may be needed to clarify your project.

If you have identified any adverse impacts which could be associated with your proposal, please describe those impacts plus any measures which you propose to avoid or minimize them.

G. Verification
I certify that the information provided is true to the best of my knowledge.

Project #1: New Local Street along Ontario Central Railroad
Project #2: Route 96 3-Lane to 5-Lane Conversion
Project #3: Route 251/Lane Road Connection
Project #4: Omnitech Place/Willowbrook Road Connection
Project #5: Plastermill Road/Collett Road/Delray Drive Connection
Project #6: Lane Road/Victor Egypt Road/Lynaugh Road Roundabout
### Description
Converts an underutilized section of the Ontario Central Railroad to a “Complete Street”, serving motorists, bicyclists, and pedestrians. It begins at Route 251 and runs parallel to Route 96, terminating at either a roundabout southeast of Lynaugh Road (currently planned for construction in 2019) or a new traffic signal at Plastermill Road. A traffic signal would also be added at Route 444 (Maple Avenue). Properties that access Route 96 would also access the new Local Street. The right-of-way is wide enough to accommodate realigned tracks for future rail service. Potential physical constraints are wetlands created by the tracks and Great Brook.

### What it Fixes
Relieves delay on Route 96 without bypassing the Village business district and increases access to properties on the east/south side of the roadway.

### Construction Costs
- Route 251 to School St: $5.3–$6.1 million
- Route 444 to Lynaugh Rd: $2.0–$2.3 million
- Route 444 to Plastermill Rd: $2.8–$3.2 million
Total: $7.3–$9.3 million*

*Relocation of railroad tracks from Route 251 to Plastermill Road estimated at $2.0–2.9 million, and would require separate funding.
Route 96 Transformative Corridor Strategic Infrastructure Plan
High Priority Project #2
Route 96 3-Lane to 5-Lane Conversion

**Description**
Reconfigures the existing segment of Route 96 from just south of Omnitech Place to Route 251 from one travel lane in each direction with a center turning lane to two travel lanes in each direction (four through travel lanes) with a center turning lane. The entire length would be curbed with eight-foot shoulders, 12-foot through travel lanes, and a 14-foot center turn lane. This configuration will better match the adjoining segment of Route 96 to the north beginning at the Main Street Fishers/Rowley Road intersection. Minimal right of way would be needed. This improvement works directly in concert with the new Local Street along the Ontario Central Railroad (High Priority Project #1) to better distribute existing and projected traffic volumes, which will reduce delay on a corridor-wide basis. It is also designed to accommodate the new Route 251/Lane Road Connection (High Priority Project #3).

**What it Fixes**
Relieves delay on Route 96, which will decrease the number of drivers using Cork Road, Dryer Road, and Rawson Road as a cut through. This improvement increases the Town’s ability to consider more development options than would be possible with the current lane configuration in this segment of the Route 96 Corridor. Overall, this is a better use of the existing pavement. This project will also reduce conflicts created by the merging of southbound traffic on Route 96 near Omnitech Place where the current lane reduction occurs.

**Construction Costs**
$1.8 million—$2.0 million
**Route 96 Transformative Corridor Strategic Infrastructure Plan**  
**High Priority Project #3**  
**Route 251/Lane Road Connection**

**Description**
Aligns Route 251 and Lane Road to create a new intersection with a traffic signal. Lane Road is shifted to the north. Route 251 and Route 96 is currently a signalized intersection with a left turn only and a right turn only lane from Route 251 onto Route 96 and no dedicated turn lanes from Route 96 onto Route 251. The redesigned intersection will feature the following lane configurations:

- **Route 251**: 300-foot left turn only lane onto northbound Route 96 and combined through-right lane to Lane Road and southbound Route 96;
- **Route 96 Southbound**: two through lanes (per Route 96 3-Lane to 5-Lane Conversion/High Priority Project #2) and a 200-foot right turn only lane onto Route 251;
- **Lane Road**: 200-foot right turn only lane onto northbound Route 96 and combined through-left lane to Route 251 and southbound Route 96; and
- **Route 96 Northbound**: two through lanes (per Route 96 3-Lane to 5-Lane Conversion/High Priority Project #2) and a 200-foot left turn only lane onto Route 251.

**What it Fixes**
Creates a single intersection to replace two offset ones, improving connectivity across Route 96. Provides dedicated turning lanes at each leg of the intersection to address the most prominent turning movements.

**Construction Costs**
$470,000–$540,000
Route 96 Transformative Corridor Strategic Infrastructure Plan
High Priority Project #4
Omnitech Place/Willowbrook Road Connection

**Description**
Extends Willowbrook Road to create a new signalized intersection at Route 96 and Omnitech Place. The Willowbrook Road extension will feature one lane in each direction with six-foot paved shoulders. The redesigned intersection will feature the following new lane configurations:
- Willowbrook Road: combined left-through-right lane to Route 96 and Omnitech Place;
- Route 96 Northbound: two through lanes and a 100-foot left turn only lane onto Omnitech Place; and
- Route 96 Southbound: two through lanes (per Route 96 3-Lane to 5-Lane Conversion/High Priority Project #2) and a 100-foot left turn only lane onto Willowbrook Road.

**What it Fixes**
Creates a new east-west connection on Route 96. Will relieve some of the congestion at the Route 96/Main Street Fishers/Rowley Road intersection and increase safety as some drivers will choose this intersection because it provides another option for making a left turn onto Route 96 northbound via a traffic signal.

**Construction Costs**
$520,000–$600,000
Route 96 Transformative Corridor Strategic Infrastructure Plan
High Priority Project #5
Plastermill Road/Collett Road/Delray Drive Connection

Description
Extends Collett Road to create a new two-way stop controlled intersection with Plastermill Road and Delray Drive. This includes an at-grade crossing of the Ontario Central Railroad at a location that is not currently anticipated to see heavy use in terms of frequent trains or long sets of railcars. This was taken into account when analyzing potential queues and their impacts on northeast bound traffic on Plastermill Road. If the frequency or length of the railroad car sets were to increase significantly, there is the opportunity to create a dedicated right turn only lane on Plastermill Road for northeast bound traffic which would reduce longer queues impacting through traffic.

What it Fixes
Travelers from the north seeking to access destinations on the eastern end of Route 96 must use either McMahon Road or Route 332. This project would create direct access for these travelers to Mertensia Road from Collett Road. Currently, drivers have difficulty making lefts off of McMahon Road onto Route 96. The project will improve safety as the intersection of Route 96 and Mertensia Road is signalized, providing for easier turns onto Route 96.

Construction Costs
$330,000–$360,000
Route 96 Transformative Corridor Strategic Infrastructure Plan
High Priority Project #6
Lane Road/Victor Egypt Road/Lynaugh Road Roundabout

**Description**
Creates a roundabout at the intersection of Lane Road, Victor Egypt Road, and Lynaugh Road. This would replace the current four-leg intersection that has stop signs for vehicles on Lane Road and Lynaugh Road seeking to access or cross Victor Egypt Road. The current speed limits at the intersection are 55 mph on Victor Egypt Road, 50 mph on Lynaugh Road, and 40 mph on Lane Road. The geometric design of the roundabout would be supplemented with signage and, if necessary, markings on the approaches to alert drivers of the appropriate speed.

**What it Fixes**
The roads at this intersection become major access points to Route 96 at the Western Approach (Lane Road – see High Priority Project #3), Village (Victor Egypt Road becomes Church Street), and Eastern End (Lynaugh Road – see High Priority Project #1). Roundabouts have been proven to reduce the severity of crashes at intersections by lowering speeds. In addition, the speed limit is reduced from 55 mph on Victor Egypt Road to 25 mph where it becomes Church Street less than one half-mile south of the intersection.

**Construction Costs**
$1.5–$2.0 million

Project Name: Route 96 Transformative Corridor Strategic Infrastructure Plan Adoption and Implementation

Subject: List of threatened and endangered species that may occur in your proposed project location, and/or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (ESA) of 1973, as amended (16 U.S.C. 1531 et seq.). This list can also be used to determine whether listed species may be present for projects without federal agency involvement. New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list.

Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the ESA, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the ECOS-IPaC site at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the ECOS-IPaC system by completing the same process used to receive the enclosed list. If listed, proposed, or candidate species were identified as potentially occurring in the project area, coordination with our office is encouraged. Information on the steps involved with assessing potential impacts from projects can be found at: http://www.fws.gov/northeast/nyfo/es/section7.htm
Please be aware that bald and golden eagles are protected under the Bald and Golden Eagle Protection Act (16 U.S.C. 668 et seq.), and projects affecting these species may require development of an eagle conservation plan (http://www.fws.gov/windenergy/eagle_guidance.html). Additionally, wind energy projects should follow the Services wind energy guidelines (http://www.fws.gov/windenergy/) for minimizing impacts to migratory birds and bats.

Guidance for minimizing impacts to migratory birds for projects including communications towers (e.g., cellular, digital television, radio, and emergency broadcast) can be found at: http://www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/towers.htm; http://www.towerkill.com; and http://www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/comtow.html.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the ESA. Please include the Consultation Tracking Number in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

Project Summary

Consultation Code: 05E1NY00-2018-SLI-2048

Event Code: 05E1NY00-2018-E-06301

Project Name: Route 96 Transformative Corridor Strategic Infrastructure Plan Adoption and Implementation

Project Type: TRANSPORTATION

Project Description: The Town of Victor plans to adopt the Route 96 Transformative Corridor Strategic Infrastructure Plan ("the Plan") developed in order to improve traffic conditions within the Route 96 Corridor in the Town and Village of Victor, including at key intersections. The Town plans to fund and implement the six high priority projects identified in the Plan in coordination with the Village of Victor, Ontario County, Genesee Transportation Council, New York State Department of Transportation, and Finger Lakes Railway. The six high priority projects are: 1) New local street along Ontario Central Railroad; 2) Route 96 3-Lane to 5-Lane Conversion; 3) Route 251/Lane Road Connection; 4) Omnitech Place/Willowbrook Road Connection; 5) Plastermill Road/Collett Road/Delray Drive Connection; and 6) Lane Road/Victor Egypt Road/Lynaugh Road Roundabout. Detailed project description, anticipated outcomes, and construction cost estimates for each high priority project are provided in the attachment. The Town also seeks to establish a Transportation Development District in order to raise the capital needed to construct the six high priority projects by levying assessments on a benefits-derived basis.

Project Location:
Approximate location of the project can be viewed in Google Maps: https://www.google.com/maps/place/42.99421323437118N77.3981611371581W
Counties: Ontario, NY
Endangered Species Act Species

There is a total of 2 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries, as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

1. NOAA Fisheries, also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

Critical habitats

THERE ARE NO CRITICAL HABITATS WITHIN YOUR PROJECT AREA UNDER THIS OFFICE'S JURISDICTION.
Disclaimer: The EAF Mapper is a screening tool intended to assist project sponsors and reviewing agencies in preparing an environmental assessment form (EAF). Not all questions asked in the EAF are answered by the EAF Mapper. Additional information on any EAF question can be obtained by consulting the EAF Workbooks. Although the EAF Mapper provides the most up-to-date digital data available to DEC, you may also need to contact local or other data sources in order to obtain data not provided by the Mapper. Digital data is not a substitute for agency determinations.

B.i.i [Coastal or Waterfront Area] No
B.i.ii [Local Waterfront Revitalization Area] No
C.2.b. [Special Planning District] Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
E.1.h [DEC Spills or Remediation Site - Potential Contamination History] Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
E.1.h.i [DEC Spills or Remediation Site - Listed] Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
E.1.h.i.ii [DEC Spills or Remediation Site - Environmental Site Remediation Database] Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
E.1.h.iii [Within 2,000' of DEC Remediation Site] Yes
E.1.h.iii [Within 2,000' of DEC Remediation Site - DEC ID] E835022
E.2.g [Unique Geologic Features] No
E.2.h.i [Surface Water Features] Yes
E.2.h.ii [Surface Water Features] Yes
E.2.h.iii [Surface Water Features] Yes - Digital mapping information on local and federal wetlands and waterbodies is known to be incomplete. Refer to EAF Workbook.
E.2.h.iv [Surface Water Features - Stream Name] 898-156
E.2.h.iv [Surface Water Features - Stream Classification] C
E.2.h.iv [Surface Water Features - Wetlands Name] Federal Waters
E.2.h.v [Impaired Water Bodies] Yes
E.2.h.v [Impaired Water Bodies - Name and Basis for Listing] Name - Pollutants - Uses: Great Brook and minor tribs – Nutrients; D.O./Oxygen Demand; Silt/Sediment – Recreation; Aquatic Life
