# 2022 TREE & SHRUB DESCRIPTIONS

**AMERICAN HAZELNUT** – *Corylus americana* The American Hazelnut is a multi-stemmed shrub with a rounded top and an open, often wide-spreading base. Grows to maximum height of 15–18' and a spread of 10–12' at maturity. It bears, in 2-3 years, an abundant crop of small, sweet tasting nuts. The nuts are easy to crack and drop free of the husk when mature. Excellent wildlife food source.

**BALSAM FIR** – *Abies balsamea* One of the more important conifers in the northern United States. Small to medium-sized, steeple-shaped tree with upright cones. Wildlife food and shelter source.

**BLACK CHERRY** – *Prunus serotina* Grows up to 50' tall. Pendulous branched tree with profuse white flowers in Spring with good Fall color. Mature trunk has 'burnt potato-chip' bark exposing reddish underbark. The fruits are usually devoured by birds/wildlife. Grows best in rich, moist, well-drained soil/full sun.

**BUTTONBUSH** – *Cephalanthus occidentalis* Deciduous shrub with an open-rounded habit that grows 6-12' tall. Easily grown in moist, humusy soils in full sun to part shade. Grows very well in wet soils, including flood conditions and shallow standing water. Flower heads are very attractive to bees and butterflies.

**COLORADO BLUE SPRUCE** – *Picea pungens* Grows up to 100'. Will reach 6' in 8-9 years, starting with a 3-year seedling. Its stiff, silvery-blue to bluish-green needles are 1" long. A handsome tree in a single planting or as a dense colorful screen or windbreak spaced 6' apart. Well-drained soil with good moisture and full sun.

**CONCOLOR FIR** – *Abies concolor* Grows up to 50'. A beautiful and easy to care for evergreen. Ashy gray trunk and silver foliage. Holds needles best of any short-needle tree. Requires good drainage.

**DOUGLAS FIR** – *Pseudotsuga menziesii* A popular tree reaching 6' in 9-10 years, starting with a 3-year seedling. Short, flat, soft blue-green needles. Grows fast in moist, well-drained soils. Full sun. Majestic evergreen.

**EASTERN REDBUD** – *Cercis canadensis* A small, irregular shaped, deciduous tree, strikingly conspicuous in the Spring as the pink to reddish purple flowers form before the leaves. Grows on a variety of sites, best on moist, well-drained soils. Flat, small reddish-brown fruit pods persist throughout Winter unless eaten by wild birds or other animals.

**ELDERBERRY** – *Sambucus canadensis* 5-12' multi-stemmed shrub. In mid June it has white flowers and in mid-August it has purple fruit when ripe, eaten by many species of birds. Elderberry tolerates most soils and roadside conditions.

**FRASER FIR** – *Abies fraseri* Shiny, green foliage is lighter on the underside. Has delightful fragrance and attractive purplish cones. Good specimen that requires good drainage.

**HYBRID POPLAR** – *Populus* Grows extremely fast to a height of 60'. Narrow crown spreads 15-20'. Good for windbreaks and screens. Requires full sun. Grows in a variety of soils.

**RED MAPLE** – *Acer rubrum* Medium-sized (20-60') tree with opposite branching and green to flaming orange Fall leaf color.

**RED OSIER DOGWOOD** – *Cornus sericea* Very geographically widespread native shrub with unique deep red stems, creamy white Spring flowers, white fruit and maroon Fall leaves. Excellent for reestablishing moist sites and stabilizing eroding streambanks. Wildlife food source for numerous species.

**RED PINE** – *Pinus resinosa* Grows up to 85' tall. Flexible, dark green needles in 2's. Grows best in moderately well-drained soils.

**RIVER BIRCH** – *Betula nigra* Shaggy-barked tree with a medium to fast growth rate to reach a height of 40-80'. The exposed inner bark color ranges from gray to cinnamon to reddish brown.

**SERVICEBERRY** – *Amelanchier canadensis* Large shrub, excellent native. Fancy white flowers in April, followed by fruit in July. Tolerates full sun/partial shade, harsh climates and alkaline soils. Good bird/wildlife food source and erosion control.

**SILVER MAPLE** – *Acer saccharinum* 50-70' fast growing upright tree with strong spreading branches. Leaves deeply five-lobed. Excellent source of shade.

**SUGAR MAPLE** – *Acer saccharum* The official New York State Tree. Grows up to 75'. Offers good shade in the Summer and brilliant scarlet-orange foliage in the Autumn. Provides maple sugar products. Thrives in well-drained soil. Full sun, but will tolerate some shade.

**SWAMP WHITE OAK** – *Quercus bicolor* Grows in rich, deep, moist to wet, poorly-drained, acidic soils in full sun. A broad, rounded crown and a short trunk typically to 50-60'. Acorns mature in early Fall. Best along streams, ponds, valleys, floodplains and the edge of wetlands. Good drought resistance. Usually has crimson shades of Fall color.

**SYCAMORE** – *Platanus occidentalis* Very fast growing hardwood that is long lived and reaches 100-140' in height. Best on creek bottoms or low slopes. Good on most sites except swamps or dry sand hills. Requires direct sunlight.

**WHITE BIRCH** – *Betula papyrifera* Grows up to 50' tall. Open green foliage. Grows best in cool, moist locations. Tolerates fairly wet locations (along water). Pendulous, graceful branches and snow-white bark. Bark turns white in 4-6 years. Plant 3-4 seedlings together to create clump effect.

**WHITE FLOWERING DOGWOOD** – *Cornus florida* Grows 20-30'. Beautiful leaf color in the Fall and showy white flowers April-May. Red fruit through late December.

**WHITE OAK** – *Quercus alba* A tall, noble tree that grows well in most soil types. Acorns provide for an important and diverse wildlife food source. Important native.

**WHITE PINE** – *Pinus strobus* Grows up to 100' tall. Moderate growth with good needle retention. Soft, flexible, green needles in groups of 5. Grows best in moderately-well drained soils. Great for mixed windbreaks or screens.

**WHITE SPRUCE** – *Picea glauca* Grows up to 90' tall reaching 6' in 7-8 years beginning with a 3-year seedling. Its stiff needles are light bluish-green, usually 1" long. Thrives in full sun and well-drained soil. Extremely hardy and will live where other varieties will not.

**WITCH-HAZEL** – *Hamamelis virginiana* 15-30' spreading shrub or small tree. Yellow fragrant flowers that last until late Autumn. Will grow in wet, shady areas as well as in the open sun. Wildlife food source.
